

## Quality and Environmental Policy

### Quality

We consistently develop our range of products and services in pursuit of our purpose of providing our customers with innovative solutions for cleaning and clearing operations on public and private roads and other traffic areas.

This is achieved through customer-focused continuous improvement, employee and supplier development and by maintaining an effective quality system that complies with statutory and regulatory requirements.

### Environment

Bucher Municipal Sweepers is committed to the protection of the environment, and prevention of pollution.

Our Environmental Management System is continuously developed and performance improved by means of monitoring our environmental impact.

We comply with applicable local national and international legal and other requirements in relation to the environmental impact of our activities.

We support the procurement of environmentally friendly, energy efficient equipment and services, as well as the planning of new or modified facilities.

We encourage waste elimination, segregation and recycling throughout the business.

The success of our Environmental Management System relies heavily on the cooperation of our workforce. Our employees recognise their responsibility to protect the environment and prevent pollution.

To ensure our employees are competent to do their work and control the environmental risks arising from our activities, clear risk assessment based instruction, information and training is provided.
